

Sewer Process Change

- **Step One**

Builder will have their plumber T.V. the S.S. lateral from City clean-out to City main. After landscape has been installed. The Front of house must be shown in video with address # on house. NO PAINT

- **Step Two**

Builder will send Inspection Affidavit and video to Public Works Email.

- **Step Three**

Builders will give at least 72 hours after video is sent in to call for ROW inspection.

- **Step Four**

An automatic email will be returned to the sender of the video stating the video was received.

City of Anna Public Works

Our main goal with the sewer change is to help streamline the Sanitary Sewer Review Process and eliminate the need for multiple trips and fees due to failed reviews. Only a one-time fee of \$100 will be due with the building permit for the review of the lateral clean-out.

All Affidavit's and video shall be emailed to Publicworks@annatexas.gov. The City staff will have all videos reviewed within 72 hours.

All videos will stay on file with the City of Anna for the extent of the Affidavit. In the event the sewer line is damaged during that time frame, the City of Anna will conduct an investigation to figure out the cause of the issue.

If it is determined that the line was hit by franchise or another entity, the City of Anna will have the responsible party correct all issues. If no Issues are found, the City of Anna will contact the person who signed the Affidavit.
